Academic Activities

1. Title: Online Exams System
Final year project on Online Exams System of PUCIT
Accuracy:" any Educational Institute or training centers can use it to develop their strategy for
Putting the exams, and for getting better results in less time
2. Title: Library Management System
3. Title: Game Development (Bouncing Ball)
Semester Project on Graphical game development, it use simple logic to move and bounce the ball

Personal Activities

1. Title: Personal Portfolio-Development of my own Portfolio
I used HTML, CSS, and JavaScript to create a website for my own portfolio. The website presents my abilities, completed projects, and work history in user-friendly format, a responsive design for optimal viewing on any device, and smooth navigation to provide an engaging user experience.
2. Title: Development of Gym Website
I created a gym website using HTML, CSS. The site allows members to check the workout class schedule, book appointments for personal training and consultations, and explore various services offered by the gym. It is user-friendly interface and responsive design
3. Title: Food Delivery Website
The idea behind the online meal ordering system is to make ordering food easier. This system makes it easier for customers to work by displaying a user interface and updating the menu with all available options
